- **Project:** - [Cryste Software Solutions](#) (Website/ Web App)  
**Technologies:** - HTML, CSS (bootstrap), JavaScript, PHP, SQL  
**IDEs:** - Visual Studio Code  
**Description:** - This project is for my own company. We started this in 2023 and with me 2 more members for the Headboard. This web page is also dynamic and have Dashboard and admin login.
- **Project:** - **Shradda TV IVR system interface** (Web Portal)  
**Technologies:** - HTML, CSS (bootstrap), JavaScript, PHP, SQL  
**IDEs:** - Visual Studio Code  
**Description:** - This system is built for Shraddha tv Ongoing IVR system. This interface will be used as a frontend to upload IVR recording and schedule IVR system.

### Mobile Apps

- **Project:** - [We chat App](#) (Android app)  
**Technologies:** - Java, gradel(groovy), XML, Firebase  
**IDEs:** - Android Studio  
**Description:** - This project, like WhatsApp, uses an email-based system instead of phone numbers. I developed the backend in Java and the frontend in XML, incorporating custom icons and images. Users can log in with their Google accounts via Firebase Authentication and find other users by email.
- **Project:** - [Recipe App](#) (Android app)  
**Technologies:** - Java, gradel(groovy), XML, Firebase  
**IDEs:** - Android Studio

**Description:** - This app allows users to view and contribute recipes. Users can log in with a custom username and password or via Google login to add recipes. A super admin account can manage users and recipes. Notifications are sent via Firebase Cloud Messaging to alert other users of new recipes.

#### **Software**

- **Project:** - Car care (Java Desktop Application)

**Technologies:** - Java(Maven), SQL(MYSQL)

**IDEs:** - Apache NetBeans

**Description:** - This project is designed for car care facilities (selling parts, repairing vehicles, service). I used mern and java for this project and as a database I used SQL for this. This project is integrated with POS system and Stock management/User Management system.
